## Progress Made in Realizing Profits

100 Million Shares Was the Volume of Business Done on Stock Exchange Yesterday.

NEW YORK, Feb. 27,-The bulky total 1 200,000 shares reached by the bustdens at the stock exchange today sinessed the continuation of the speculaire interest of the traders. The day, perett, was distinctly devoted to a prous of digestion, and there were no such glent advances as there were last week replet advances as there was was was tery substantial progress was made, between in realizing the profits caused by last week's advances. During the realence of an active speculation and inscentinued rise in prices. Mondays are lively chosen to effect a distribution of admired and to convert paper profits into

Such a movement was been resulted to the rise in prices the itsernitive power of the market was what residently remarked. The resistance offered to the selling was shelped by any notable new development, with the exception of the striking exement in Southern Pacific. The aduce in this stock was explained in some cariers as an adjustment to the recent explained in the shellary stock has not shared, but an aditional motive for the buying was of total in the circulation of the rumor that stridend payment on the stock had been actically determined upon. Hutton New York, says: "Transactions on a heavy scale were seen again today with meny new high records. Sailing was in evidence in a large volume in certain of the issue and the buying in stocks that have been inactive for a long period. Southern Pacific was a feature in the Harriman group. Union Pacific, while it hold well, was undoubtedly heavily sold. Steels were taken up in the late dealings and advanced under large transactions to new high level. It is not improbable that hefore this year closes important developments will explain the present heavy buying in steels. Conditions are favorable for higher values and we look for only slight reactions for the present.

Logan & Beyan. New York, say. "Market closing irregular and generally lower. Today's session was marked by much irregularity, but throughout the session the market seemed to show a reactionary leadency. On the whole, the general market seems to reflect much uncertainty and nervounness. Market has had a remarkable advance and we feel a reaction at this time would help the general situation. Dick Bros. New York, say. "Market has been very stratte and excited today. There was extensive solling in all of these stocks, which were buoyant last week, but new leaders appears." ### Grain and Provisions.

Grain and Provisions.

CHICAGO, Feb. 27.—A sensational slump of nearly 4 cents per bushel apparently ended a huge deal in May wheat. The break was due to seeming abandenment of the deal. The market raillied considerably on covering by shorts, but at the close May was still 12-62c below Saturday's final quotations. July showed a net loss of \$\frac{1}{2}\$c. The break in wheat prices developed after trading was well under way. At the opening quotations were about on a level with Saturday's closing figures. Stop-loss orders heavily increased the selling pressure.

Total sales of May wheat today by the Eastern coterie are said to have aggregated 5.000,000 bushels. The decline was finally checked by liberal support from a strong built trader, who bought persistently around what proved to be the low point of the day. Other big houses also came to the support of the market. Shorts took advantage of the break and covered freely. The purchases effected a partial restoration of confidence and brought about a rally which landed the May price at \$1.500,000,000. The market in general was controlled almost entirely by the course of the May option.
